Water heating energy efficiency under colder and warmer climate conditions

$$\text{Colder: } \overset{3}{115.0} - 0,2 \times \overset{2}{22.0} = \overset{3}{110.6} \%$$

$$\text{Warmer: } \overset{3}{115.0} + 0,4 \times \overset{2}{22.0} = \overset{3}{123.8} \%$$

The energy efficiency of the package of products provided for in this fiche may not correspond to its actual energy efficiency once installed in a building, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.
